10ZiG

MANAGER™

Tech & Firmware Notification

10ZiG Manager™ 5.5.1.7

November 23, 2026

10ZiG Manager™ 5.5.1.7

Component Versions

Manager Server version: 5.5.1.7

Web Console version: 5.5.1.7

Secure Connector version: 1.0.2.12

MySQL Server version: 8.4.11

MySQLConnector: 2.6.2

Included XTC Agent version: 2.1.0.23

PXERecoveryLinux version: 6.26.0107.1124

Known Limitations

N/A

Additional Notes

Regarding the following nessus link, 10ZiG considers the risk of remote exploitation mitigated because the bundled MySQL service listens only on 127.0.0.1 and accepts connections solely from the 10ZiG Manager server itself. The MySQL Server version will be updated in a future version.
https://www.tenable.com/plugins/nessus/370442

10ZiG Manager™ Server

New Features/Enhancements

Added support for TZ Secure Agent.

Added support for signed 16.6 onwards OS/firmware packages (tzupg).

Updated MySQL to 8.4.11.

Updated MySqlConnector to v2.6.2.

MgrDbBackup Utility: Added support for database export for 10ZiG Manager v6 migration.

Integrated latest PXERecovery (v6.26.0107).

Added support for user override settings.

Continued...

Fixed Issues

Automatic configuration / upgrade tasks failing to apply.

Incorporate latest Windows 10 IoT LTSC 2019 registration key used by sysprep during Windows image cloning.

MgrDbBackup Utility didn't support MySQL8.

Reboot Command failing from 10ZiG Manager when using ODP (On Demand Ports) and Scheduled Tasks.

Custom screensaver files are not saving into template.

Soft Factory Reset does not clear existing template association.

MgrDbBackup tool, browse (ellipses) button does not work on the "Export" tab.

Unable to install signed OS/firmware (tzupg) larger than 2GB.

Generate Report CSV columns shift when devices have multiple configuration templates.

Various versions reporting in AboutDialog were broken.

Very early access control DB triggers are not getting updated causing insertion errors.

10ZiG Manager™ Web Console

New Features/Enhancements

Added Column to 10ZiG Manager to display "Last applied" template.

Fixed Issues

Unable to import templates via Web Console.

Refresh context menu doesn't refresh unit and clears search results.

Unit information missing in the web console properties pane.

Hide Grouped Clients option doesn't work.

Express stack trace on externally published management server.

Firmware add-ons list box is not properly cleared before adding a new group.

Certificate applet displaying empty certificate(s) in web console.

RPOS License Type reporting "Unknown" with valid license.

Move/Copy logs off when group tree has no selection.

10ZiG Manager™ Secure Connector

Fixed Issues

Secure connected clients appearing offline after checking-in when using On Demand Ports (ODP).

Spanish display language/locale causes the Secure Connector service to crash resulting in "Cannot Get /licmgr" when accessing Web Console or License Manager.

10ZiG Manager™ License Manager

Fixed Issues

Unable to log in to the License Manager - JSON Syntax error.

Trust Center Connector (HP)

Removed HP Trust Center Connector.
